Amit Chaudhary

Frontend Engineer · React & Next.js

7984469854 · chaudharyamit735@gmail.com · linkedin.com/in/chaudharyamit735

Professional Summary

Frontend Engineer with 3+ years of experience building scalable, performant web applications using React, Next.js, and modern JavaScript (ES6+). Proven track record of migrating enterprise apps, optimising page speed, and delivering clean, component-driven UIs. Experienced collaborating in agile, distributed teams; comfortable integrating RESTful APIs and GraphQL; familiar with CI/CD workflows and version control best practices via Git and Azure.

Technical Skills

Core Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React 18, Next.js 12–15, OWL.js, Node.js, Express.js

Styling: Tailwind CSS, Bootstrap, CSS Modules, Responsive Design

Data Fetching: RESTful APIs, GraphQL (TanStack Query, Apollo), Socket.io

CMS / Backend: Headless CMS integration, Prismic-compatible architecture, PostgreSQL, MongoDB

Performance & PWA: PWA, IndexedDB, Lazy Loading, Code Splitting, Next.js SSR/SSG/ISR

State Management: React Context, Redux, TanStack Query

Data Visualisation: Recharts, Dynamic Reporting

Tools & DevOps: Git, GitHub, Azure Boards, SonarQube, Figma, CI/CD pipelines

Methodologies: Agile / Scrum, Cross-functional collaboration, Code reviews

Professional Experience

Software Engineer | Brainvire Infotech *Jan 2023 – Present · Onsite*

- Engineered and maintained multiple production-grade React 18 & Next.js 12–15 applications, ensuring responsive, accessible, and SEO-optimised UI across enterprise clients.
- Migrated 3 enterprise apps to React 18, modernising legacy patterns and resolving breaking dependencies, resulting in improved stability and performance.
- Migrated a large Next.js project from v11 to v15, resolving dependency conflicts and applying latest rendering strategies (SSR/SSG/ISR) to boost page-speed scores.
- Reduced user wait time by 40% on a PWA dashboard by leveraging Service Workers, IndexedDB caching, and optimised data-fetching patterns with TanStack Query.
- Built reusable, composable React component libraries used across multiple projects, enforcing design consistency and accelerating feature delivery.
- Integrated GraphQL APIs with TanStack Query and managed RESTful API consumption, collaborating closely with backend engineers on schema design and data contracts.
- Engineered interactive data visualisation dashboards using React Recharts, providing real-time business insights for product and operations teams.
- Applied Tailwind CSS and Bootstrap to deliver modern, pixel-perfect UIs aligned with Figma designs, working in close partnership with UX designers.

- Led architectural decisions in cross-functional agile squads, conducting code reviews and championing best practices tracked via SonarQube; improved team delivery efficiency by 20%.
- Established Git branching strategies, PR workflows, and merge processes to maintain code quality and enable smooth CI/CD deployments via Azure Pipelines.

Key Projects

Pidilite Enterprise Dashboard — *Next.js 15 · React 18 · Tailwind CSS · TanStack Query · PWA · Recharts*

- Migrated 3 enterprise applications to React 18, resolving legacy patterns and improving overall stability.
- Built an interactive dashboard with real-time data visualisation using Recharts, enabling executive-level reporting.
- Implemented PWA capabilities with IndexedDB, cutting user wait time by 40% on slow connections.

E-commerce Extension — *Next.js 15 · React 18 · Magento · Laravel API*

- Led migration from Next.js v11 to v15, applying the App Router, updated rendering strategies, and eliminating stale dependencies.
- Implemented performance optimisations (image optimisation, route pre-fetching, dynamic imports) significantly improving Core Web Vitals scores.

Brainvire Learning Management System — *Next.js 12 · Node.js · Express.js*

- Developed a scalable LMS with SSR-powered Next.js frontend and Node.js/Express.js backend, serving interactive educational content and course management.
- Applied agile methodologies with a cross-functional team, prioritising features through iterative sprints based on user feedback.
- Optimised page-speed for key landing and course pages, improving Lighthouse scores and SEO performance.

Real-time Chat Application — *React 18 · Node.js · Express.js · MongoDB · Socket.io*

- Built a scalable real-time chat platform with Socket.io handling live message delivery, 1-to-1 calls, and group video calls.
- Architected role-based content access, dynamically adapting UI and features based on user type via RESTful API permissions.

Admin Panel — Base Structure — *React 18 · Node.js · GraphQL*

- Built a fully dynamic, permission-driven admin panel framework that can be adopted as a starter template for any project.
- Integrated GraphQL API; module visibility is driven by user permissions returned from the API, enabling zero-config multi-tenant setups.
- Maintained code quality standards using SonarQube; managed tasks and sprints via Azure Boards and Storybook component docs.

Education

Bachelor of Engineering — Electronics & Communication *Jul 2017 – Apr 2021*

Government Engineering College, Bhavnagar — Gujarat, India

Certifications

- The Complete JavaScript Course 2024: From Zero to Expert
- Next.js & React — The Complete Guide (incl. Two Paths!)
- React — The Complete Guide 2024 (incl. Next.js, Redux)
- Web Design for Beginners: Real World Coding in HTML & CSS
